PROFILE / SUMMARY

Information Technology student at BVM Engineering College with hands-on experience building and deploying full-stack web applications using Django, Python, JavaScript, and PostgreSQL. Built Skillify, a live peer-to-peer tutoring platform with real-time messaging, OAuth authentication, Razorpay payments, and cloud deployment. Completed a summer AI/ML internship at Agevole Innovation Pvt. Ltd., building a Student Performance Prediction System with a Streamlit dashboard. Currently developing InvoiceIQ, an AI-powered GST reconciliation and fraud detection platform, as part of a four-person capstone project. Additionally pursuing game development using Unity Engine and C#, with a top-down 2D RPG project featuring enemy AI, inventory systems, and modular architecture. Completed a web development internship with exposure to PHP, ASP.NET, and SQL in a production environment.

EDUCATION

Birla Vishvakarma Mahavidyalaya (BVM), Anand

B.Tech – Information Technology

2022 – Present | Anand, Gujarat

CPI: 5.71 / 10 | Student ID: 22IT446

Vibrant School of Science

Higher Secondary – Class XII (Science)

2021 – 2022 | Deesa, Gujarat

Percentage: 75.23% | Grade: B1

Sardar Patel School

Secondary – Class X

2019 – 2020 | Deesa, Gujarat

Percentage: 61.33% | Grade: B2

INDUSTRIAL EXPERIENCE

Agevole Innovation Pvt. Ltd.

AI/ML Intern (Intern ID: AG682)

June 2026 | Surat, Gujarat

Mentor: Masum Patel

- Built a Student Performance Prediction System using machine learning to forecast academic outcomes from historical performance and behavioral data.
- Designed and deployed an interactive Streamlit dashboard for real-time visualization of predictions and performance trends.
- Handled the complete pipeline: data preprocessing, feature engineering, model training/evaluation, and deployment.
- Authored a comprehensive 45-page internship report following strict college documentation and formatting guidelines.

Hit Web Solutions

Web Development Intern

June 2025 | Ahmedabad, Gujarat

1 Month

- Developed and maintained responsive web pages using HTML, CSS, and JavaScript.
- Built server-side functionality using PHP / ASP.NET and integrated SQL/MySQL databases for data storage and retrieval.
- Participated in debugging, testing, and performance improvement of live web applications.
- Collaborated with team members to gather requirements and implement features end-to-end.
- Gained practical exposure to full-stack web development workflows in a production environment.

PROJECTS

InvoiceIQ – AI-Powered GST Reconciliation & Fraud Detection Platform

Ongoing | Capstone Project

Python · Isolation Forest · Logistic Regression · NetworkX · SHAP · Ollama · ChromaDB · FastAPI · PostgreSQL

- Building an advanced AI-powered GST reconciliation system that automates invoice matching and proactively detects fraud, reducing a multi-day manual effort to minutes.
- Combining rule-based matching with Isolation Forests, Network Graph analysis, and SHAP explainability to detect anomalies and circular-trading fraud patterns.
- Integrating a local RAG Assistant (Ollama + ChromaDB) so auditing firms can leverage AI securely, providing a scalable foundation for modern tax compliance.
- Team of 4 (Group 13, 4IT31): Hitarth Shah (Lead), Rajput Siddhraj (22IT446), Sujal Patel, Krunal Rohit.

Skillify – Peer-to-Peer Tutoring Platform

Live | skillify-tr3e.onrender.com

Django · PostgreSQL (Neon) · Razorpay · Brevo · Google OAuth · JavaScript · Render

- Full-stack tutoring marketplace connecting learners with tutors; features session booking, multi-filter tutor discovery, and real-time messaging with AJAX unread badges.
- Integrated Google OAuth (django-allauth), Razorpay UPI payment flow, and Brevo HTTP email API to bypass Render's SMTP port restrictions.
- Built dark mode with CSS global variables, a trust tier label system (New Tutor → Master Tutor), and idempotent demo-data seeding via a custom Django management command.
- Deployed on Render's free tier using Neon PostgreSQL; managed all secrets via environment variables with no hardcoded credentials.
- Team: Rajput Siddhraj (22IT446), Krunal Rohit, Jyot Sharma | Guide: Prof. Prachi K. Shah

Unity 2D RPG Game

Completed

Unity Engine · C# · Tilemap · 2D Physics

Personal Project

- Developed a top-down 2D RPG in Unity with player movement, enemy AI (patrol/chase/attack), and tilemap-based level design.
- Implemented inventory system, health/damage mechanics, and modular C# architecture using ScriptableObjects for scalability.

SKILLS

Languages: Python, JavaScript, C++, Java, C#, PHP, HTML/CSS, SQL

Frameworks & Libraries: Django, FastAPI, Bootstrap, ASP.NET

Databases: PostgreSQL, MySQL, SQLite

AI/ML & Data: scikit-learn, Isolation Forest, SHAP, Streamlit, Pandas, NetworkX

Tools & Platforms: Git, GitHub, Render, Neon, VS Code, Unity Engine, Ollama, ChromaDB

Concepts: Full-Stack Web Development, REST APIs, OAuth, OOP, Data Structures, Cloud Deployment, Game Development, 2D Physics, Enemy AI, Machine Learning, RAG

Game Dev: Unity Engine, C#, Tilemap, ScriptableObjects, 2D Physics, Enemy AI, Inventory Systems

Languages (Spoken): Gujarati (Native), Hindi, English

ACHIEVEMENTS

- Completed a summer AI/ML internship at Agevole Innovation Pvt. Ltd., delivering a Student Performance Prediction System with a Streamlit dashboard.
- Completed a full-stack web development internship at Hit Web Solutions, Ahmedabad.
- Deployed a live cloud-hosted platform (Skillify) with payment gateway, OAuth, and transactional email integrations.

VOLUNTEER / CO-CURRICULAR

Team Member – Skillify Project, BVM Engineering College

2024 – 2025

- Led technical implementation in a 3-member team; handled architecture, feature development, deployment, and project documentation under faculty guidance.
